

Bra Features

ORGANIC COTTON

Made with soft organic cotton grown without the use of toxic pesticides. A hint of spandex provides moderate compression.

SEWN INSIDE OUT

Shields incisions from seams that can rub, poke, and burn.

HOOK & EYE FRONT CLOSURE

Makes it easy for nurses to fasten the bra on patients and for women to do it themselves.

HIGH UNDERARM COVERAGE

Prevents scars from rubbing on clothes.

SEAMLESS CUPS

Protects nipples from rough, unlined seams.

FRONT ADJUSTABLE STRAPS

Meets the needs of different body types.

LATEX-FREE

Eliminates possible allergic reactions to rubber-based elastic.

FULL BACK COVERAGE

Minimizes pressure on shoulders.

What Women Say

For the first time since surgery I was able to get a good night sleep!

I love this bra. It's my 3rd breast surgery this year and I wish I had this bra for the other ones.

I feel very comfortable all day while wearing BraLisa. I am currently in post-cancer treatment and I feel well-protected and tucked-in from this bra.

I love this bra. It's perfect for after surgery. The adjustability and its overall softness is really perfect. Anyone who tries it will love it!

It's the most comfortable bra I have ever worn!

BraLisa®

Supporting Your Power to Heal

The Post-Op Bra Women Want To Wear

Women Need A Better Bra To Heal

BraLisa is a soft, supportive, and comfortable bra for women healing from breast surgery. We designed BraLisa with over one million women in mind who undergo some type of breast surgery in the U.S. each year.

Our aim is to help women heal by making a bra that gently supports their breasts. After a year of testing bra styles on post-op patients, we designed a bra that women love!

Our Survey Research

Ninety-seven percent of the women BraLisa surveyed, who have had breast surgeries, agree that it is impossible to find a comfortable bra to support their recovery. Bras given to them by their surgeon or that they purchased, poke and scratch in all the places where the bra touches their incisions. Virtually no one found a bra they could wear comfortably all day and night.

A Post-Op Bra Women Can Wear All Day, Everyday

BraLisa's soft feel and moderate compression promotes deep healing

All Post-Op Bras Are Not Equal

Most post-op bras are produced overseas using synthetic fabric that can itch and cause debilitating skin irritations. The seams and elastic band are often rough and unlined, causing immense discomfort. This can prevent relaxation and proper healing.

BraLisa is different.

Women Deserve Better

Our research shows that most women remain silent about their post-op bra discomfort. We created BraLisa to break the silence and revolutionize the post-op bra industry. BraLisa can meet the needs of women who have had a breast augmentation, lift, reduction, biopsy lumpectomy, mastectomy, and reconstruction. Our soft, moderate compression bra promotes deep healing. **There's nothing else like it!**
